

The Fairfield Lake State Park is truly a treasure for our small county.

The park draws in people from not only our county but from all over the State. The bass fishing is some of the best in the State. The tourism that the Park brings has a big impact on our county.

The Park being in central Texas has attracted many families to meet here in a central location for family reunions year after year.

The Park is not only famous for fishing and camping, but also for this natural habitat that is home for so many animals, birds, butterflies and more. Many of our county children and adults are able to benefit from the good experiences in nature that they may not have if we don't have the Park.

When I search attractions for Freestone County, the first one that pops up is the Fairfield Lake State Park. Next are the 2 museums that we have. Our history is so important. The historical graves that are on the Park site are a part of all of our history. They should be preserved.

The loss of the Fairfield Lake State Park will definitely have a huge negative impact not only on Freestone County citizens, but also to our State.
